# Why to go Solar

Solar power is an **Eco-friendly** energy solution that emits no greenhouse gases and reduces fossil fuel dependence. It provides **Clean, Renewable energy** even on cloudy days, operating silently. This system suits various devices, reducing bills upto **70-80%** and Low maintenance. It's modular, scalable, with efficient panels, offering a quick ROI and 25-year lifespan.

If you want to Reduce Electricity bills upto **70-80%**, you should install high efficiency **Supreme Off Grid Solar Inverter**.

These Inverter designed with Eco friendly features and provides several advantages to customers and help to save money. Supreme Off-Grid Solar inverters are easy to install and maintain and its works independently without the utility Grid.

## Salient Features

- High Efficiency Inbuilt Solar charging
- Wide Solar Input Range
- LCD display with AC and DC Energy parameters.
- Easy-to-install and low maintenance cost.
- Multi-stage Battery Charging feature.
- Pure sine wave with 100% tracking of the Solar Panel.
- Extreme operating temperature i.e. 0°C-50°C.
- Preference for Solar Power Over Grid Power.
- Eco-Friendly and reduces carbon footprints.
- Supply constant output voltage recommended for better and longer life of home and commercial equipments.

## Advantages

- Avoids Power Fluctuation and Outages.
- Reduced Electricity Bills.
- Keeping the environment Clean and Green.
- Easy alternate source for Rural area.
- Easier Installation and Low Maintenance cost.

## Application

- House hold gadgets like Lights, Fans, T.V., Home Theatre, Mixie, Fridge, Washing Machine, A.C., C.C.T.V., Wifi, etc.
- Charging Electrical Vehicle.
- Clinic, Hospitals, Bank, ATM, Hotels.
- High capacity water motor pumps.
- Lift operation
- Small/Medium/Large offices and Industries.
- Petrol Pumps

# Product Range Available

**Supreme**

Single Phase

1.0 KVA - 20.0 KVA

Three Phase to Single Phase

5.0 KVA - 40.0 KVA

Three Phase to Three Phase

5.0 KVA - 100.0 KVA
